**your questions answered**

**Carpet Cleaning**

**Q:** Will my carpet get dirty more quickly after it has been cleaned?

**A:** 10-11-2006 - Hi Luc, If your carpet is cleaned by a professional using the proper cleaners it should not get dirty faster. Residue left behind by cheap soaps and poor rinsing is what causes it to get dirty faster. Over the counter spotters can also have the same effect. Remember less is more when spot cleaning. Put spot cleaner on towel and blot up spot. Never pour spotter on carpet. Paul

**Q:** I have a stain on my carpet that I have cleaned a few times already. The problem is the stain keeps coming back after a month or so. I heard it's because the stain is still in the padding. I would assume the stained padding would be dry and not come through, but it does. How can I get it out of the padding so it doesn't come through to the carpet anymore.

**A:** 10-11-2006 - Hello Angela, Usually when there is a stain in the padding it will show up during or right after the drying process. This is called wicking. The fiber of the carpet acts like a candle wick by drawing the stain up. If the stain reappears much later as your's does it more likely is caused by a residue problem. To much cleaner without proper rinsing causes the fiber to become sticky and attract the soil to it. You need hot water extraction to remove the residue and stop the resoiling problem. It may take a couple of times to get all the residue out. Any questions call my office. They will be happy to help. Paul
